

Pendant push-button controllers

Company presentation

A recognised vocation: dedicated process control components

Since its formation in 1947, MAFELEC has been a designer and manufacturer of **custom-built process control components** in medium or large-scale production runs for use in difficult stress or environmental conditions.

This reputation enables MAFELEC to take part in the development of many programmes in industry, rail transport and defence.

MAFELEC has constantly been able **to anticipate the needs** of its customers through active participation in product and equipment development at a very early stage to build in operational stresses, quality levels and cost optimisation specifications.

CL. GEC ALSTHOM / SNCF-CAV

An international name: matching customer requirements

MAFELEC outfits ships, trains and many other types of industrial equipment throughout the world.

MAFELEC acquired its name from its customers through its ability to apply technologies as varied and complementary as electrotechnics, mechanical engineering, electronics and IT.

The company's experience allows it to claim a place among the **leaders** in the field of dedicated components.

PHOTO DCN

Innovation and personalised service: integration of new technologies

Thanks to its technical and engineering design team, MAFELEC researches and finalises many new products each year to match its customers' **specific requirements**.

Each product undergoes technical developments, computation, simulation, approval testing, production using large-scale CAD systems and laboratory tests to ensure that the specifications contained in the customer's schedule of conditions are observed.

A concept of integrated quality: overall project management

Aware that its products are used in environments where safety is paramount, MAFELEC integrates quality at every stage, from the schedule of conditions through technical development to the product manufacturing stage.

MAFELEC has ISO 9002, RAQ2 and AQFM2 certification and integrates the specific requirements of each of its customers in order to maintain its reputation for reliability and observance of international standards.

Plastic range characteristics

■ General

- Large range of watertight plastic pendant controllers for auxiliary circuits, fitted with our Ø 22 mm control and signalling units.
- Standard plastic boxes with double insulation and intuitive operating from 1 to 14 buttons.
- Box kits, empty with cut-out or fitted with switches to customer requirements.
- Applications.
 - Industry / Railways / Marine and Defence
 All handling and lifting applications.

■ Environment characteristics for auxiliary circuits

Conforming to	● IEC 947-5.1 ; NFC 63140 / 63141
Approvals	● BV - LROS - RINA - ASE - DEMKO - CSA - VDE - SEMKO - (UL)
Housings	● yellow polypropylene ● Double insulation (except auxiliaries for M and N holes)
Protection treatment	● Tropicalisation (up to + 40°C at 95% humidity)
Ambiant temperature	● Storage: - 40°C + 70°C ● Operation: - 25°C + 70°C
Electric shocks protection	● Class 2
Functioning position	● All positions
Degree of protection	● IP669 as per NFC 20 010 - 6: Totally protected against dust - 6: Protected against strong jets of water, eg for use on shipdecks - limited ingress permitted - 7: Impact 6.00 joules
Wire entrance	● Rubber terminal Dimensions for 2 buttons pendant controllers : Ø from 7 to 13 mm Dimensions for 1 to 14 buttons pendant controllers : Ø from 10 to 24 mm

■ Technical data (according to IEC 947-5.1)

Nominal thermal current	● 10 A as per IEC 947-5.1
Nominal insulation voltage	● 500 V as per NFC 20 040
Short time rating	● 250 A for 100 ms
Insulation standard	● C as per NFC 20040
Mechanical endurance	● Push-buttons : 1 x 10 ⁶ operations ● Switches : 0,5 x 10 ⁶ operations
Connection	● Screw and clamping plate : mini 1 x 0,5 SQ mm / max. : 2,5 SQ mm
Contact operation mode	● 1 speed and 2 speeds contact blocks with dependent action; positive working openature

Voltage (V)	AC11			DC11

Pendant push-button controllers metal range

Metal range characteristics

■ General

- Large range of watertight metal pendant controllers for auxiliary circuits, fitted with our Ø 22 mm control and signalling units.
- Standard metal boxes from 2 to 7 buttons.
- Box kits, empty with cut-out or fitted with switches to customer requirements.
- Applications.
 - Industry / Railways / Marine and Defence
 - All handling and lifting applications.

■ Environment characteristics for auxiliary circuits

Conforming to	● IEC 947-5.1 ; NFC 63140 / 63141
Approvals	● BV - LROS - RINA - ASE - DEMKO - CSA - VDE - SEMKO - (UL)
Housings	● Yellow metal (painted aluminium)
Protection treatment	● Tropicalisation (up to + 40°C at 95% humidity)
Ambiant temperature	● Storage: - 40°C + 70°C ● Operation: - 25°C + 70°C
Electric shocks protection	● Class 2
Functioning position	● All positions
Degree of protection	● IP669 as per NFC 20 010 - 6: Totally protected against dust - 6: Protected against strong jets of water, eg for use on shipdecks - limited ingress permitted - 9: Impact 20.00 joules
Wire entrance	● Rubber terminal Dimensions for 2 buttons CPV pendant controllers : Ø from 7 to 13 mm Dimensions for 2 to 7 buttons pendant controllers : Ø from 10 to 22 mm

■ Technical data (according to IEC 957-5.1)

Nominal thermal current	● 10 A as per IEC 947-5.1
Nominal insulation voltage	● 500 V as per NFC 20 040
Short time rating	● 250 A for 100 ms
Insulation standard	● C as per NFC 20040
Mechanical endurance	● Push-buttons : 1 x 10 ⁶ operations ● Switches : 0,5 x 10 ⁶ operations
Connection	● Screw and clamping plate : mini 1 x 0,5 sq mm / max. : 2,5 sq mm
Contact operation mode	● 1 speed and 2 speeds contact blocks with dependent action; positive working aperture

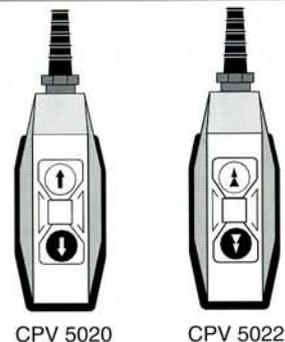

Voltage (V)	AC11			DC11		
	220	380	500	24	48	110
Current max. (A)	10	4,5	4	5	3	2
